

genesig[®] SARS-CoV-2 Winterplex

NOVACYT
GROUP

Research
Use Only

Is it
COVID-19,
Flu A,
Flu B
or RSV?

In line with CDS's recommendation for multiplex testing, is your lab capable of differentiating COVID-19, Flu A, Flu B, or RSV? We can help equip your lab with that capability with Winterplex™, the only TOOL you need for the FLU season.

Winterplex™ enables simultaneous rapid real-time PCR detection of multiple winter viruses in one assay, saving you time and money, and most importantly saving lives. This assay can differentiate:

- SARS-CoV-2 (ORF1ab, M gene, and S gene)
- Influenza A
- Influenza B
- Respiratory Syncytial Virus (RSV A and B)
